Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

(I) Claims 1-42 are drawn a stator structure classified in class 310, subclass 216.

(II) Claims 43-44 are drawn to to method of making a stator, classified in class 29, subclass 596.

The inventions are distinct, each from the other because of the following reasons: Inventions in groups I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different products or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case there are various methods to fabricate a stator including automatic machinery process and/or manual process, wherein each process having various orders of fabricating steps. Also, the method of forming the stator in the present invention can be employed to form other magnetic elements such as magnetic sensor, magnetic bearings, and magnetic switches.

A telephone call was made to Mr. Mare A. Vivenzio, on 2/15/05 to request an oral election to the above restriction requirement, but Mr. Vivenzio could not be reached; therefore, did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 2834

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
